

DevOps Software Developer - Louis Sader

Windham, NH | 603-275-7513 | [Email](#) | [LinkedIn](#) | [GitHub](#) | [Portfolio Website](#)

EDUCATION

Bachelor of Science in Computer Science | Dean's List | ABET Accredited
Roger Williams University | Bristol, RI | Minors: Mathematics, Data Science

Graduated May 2025

CERTIFICATIONS

- AWS Solutions Architect Associate – *April 2026*
- CompTIA Security+ – *May 2026*

PROFESSIONAL EXPERIENCE

DevOps Software Developer | Solid State Scientific Corporation | Nashua NH

Incoming – May 2026

Founder, Full-Stack Freelance Web Developer | Startup

December 2025 – Present

- Rebuilding static site (0% SEO score, no backend) into a full-stack platform with SMS notifications to boost customer retention, SEO optimization targeting first-page local search visibility, and a self-service admin and client dashboard for real-time analytics monitoring, menu/promotion management, eliminating developer dependency.

Full-Stack Software Developer | [Rogo Coaching Platform](#) | Remote Startup

October 2025 – February 2026

- Drove 30% user base increase and reduced authentication errors. Optimized authentication flow (OAuth, real-time validation, password reset) using SvelteKit, TypeScript, and Firebase.

PROFESSIONAL PROJECTS

Strava Race Time Predictor | Python, React, Machine Learning | [GitHub](#)

- Created ML-powered prediction system achieving less than 5% error across 1,000+ runs and transforms race planning from 2+ hours of manual analysis to 30 seconds of automated predictions.
- Engineered feature pipeline (15+ metrics from Strava API) improving model accuracy 23% over baseline which demonstrates strong ML fundamentals and real-world data engineering.
- Built interactive React frontend (GPS heatmaps, timeline visualizations) with Flask REST API and full-stack execution from data pipeline to production UI.

HomeLab Infrastructure Monitor | Python, FastAPI, PostgreSQL, Docker, DevOps | [GitHub](#)

- Built production-ready monitoring system providing real-time infrastructure insights (less than 1s data lag, and under 200ms API response times). Enables proactive system management and performance optimization.
- Designed 15 REST endpoints with async ORM and optimized queries; containerized with 60% image size reduction and reduced deployment friction and improved system scalability.

AWS Serverless URL Shortener | Python, AWS CDK, Lambda, DynamoDB, GitHub Actions | [GitHub](#)

- Architected and deployed a production-grade serverless application on AWS using Lambda, API Gateway, and DynamoDB, achieving sub-10 ms query latency, ~1,000 requests per second with secure, least-privilege IAM controls.
- Implemented end-to-end CI/CD and infrastructure-as-code using GitHub Actions and AWS CDK (TypeScript), enabling automated testing, environment-separated deployments, and reproducible cloud infrastructure.

Product Management System | Python, Flask, FastAPI, PostgreSQL, Docker | [GitHub](#)

- Delivered dual Flask + FastAPI implementations exceeding requirements (7 REST endpoints, API key auth, rate limiting, CSV/JSON export, 85% test coverage). Demonstrated mastery of multiple web frameworks.
- Built auto-generated API docs reducing developer onboarding time by 70% which improved team velocity and reduced learning curve for new collaborators.

TECHNICAL SKILLS

Languages: Python, Java, C++, C#, SQL, HTML

Backend & APIs: FastAPI, Flask, SQLAlchemy, REST API, Async/Await, API Authentication, Rate Limiting, Spring

Frontend: React, JavaScript, TypeScript, SvelteKit, Tailwind CSS, Vite

DevOps & Infrastructure: Docker, Linux, Terraform, AWS, GitHub Actions (CI/CD), Vercel, Cursor IDE

Data & Machine Learning: pandas, numpy, scikit-learn, Feature Engineering, Regression Modeling, LSTM, XGBoost

Engineering Practices: AGILE, Data Structures, Object-Oriented Design/Development, Test-Driven Development (pytest), Database Schema Design, OpenAPI, Monitoring & Logging

COLLEGIATE LEADERSHIP

NCAA Division III Student-Athlete | Men's Cross Country & Track

August 2021 - May 2025

- Contributed to 6 Conference Championships while managing rigorous training schedule and full academic course load
- Named to All-Community Service Team during senior year track season.
- Student-Athlete Advisory Committee Member. Volunteered 40+ hours at Gillette Stadium for team fundraising.
